Every Arabic letter has a specific point of articulation in the mouth or throat. Learning these points is crucial because mispronouncing a letter changes the word's meaning. Islamguiden provides detailed explanations and audio examples to help you identify and practice each makhraj.

For example, some letters are heavy (mufakhkham), some light (muraqqaq), some nasalized (ghunnah), and others have different attributes affecting how they sound. Recognizing these traits helps in producing the correct phonetic effect.

Types of Madd (Prolongation)

Prolonging certain vowels is necessary to maintain the rhythm and flow of the Quranic text. Islamguiden explains the different kinds of madd—natural, secondary, and obligatory—and how to apply them during recitation.
