what is sama training: Transformation of Archives and Heritage Education in Post-apartheid South Africa Geraldine Frieslaar, Olusegun Morakinyo, 2023-06-10 Although there have been significant strides to transform the demographics of archive and museum personnel, develop new museums and heritage institutions and heritage training initiatives in post-apartheid South Africa, the Eurocentric model of the archive, museum and heritage sector has largely remained intact. Despite the euphoria around the transformation of heritage in the beginnings of post-apartheid South Africa, it can be argued that the transformation of heritage institutions has been superficial and cosmetic with the ideological foundation of the colonial archive and museum, as well as Eurocentric modalities of heritage education remaining solid, largely unmoved, and under continuing challenge. This is the thrust of this book which reflects on the transformation of archives, and museum and heritage education in South Africa and argues for meaningful transformation of the sector through a decolonisation from its Eurocentric mooring.

what is sama training: Give Work Leila Janah, 2017-09-26 Want to end poverty for good? Entrepreneur and Samasource founder Leila Janah has the solution—give work, not aid. “An audacious, inspiring, and practical book. Leila shows how it’s possible to build a successful business that lifts people out of poverty—not by giving them money but by giving them work. It’s required reading for anyone who’s passionate about solving real problems.” —Adam Grant, author of Give and Take and Originals Despite trillions of dollars in Western aid, 2.8 billion people worldwide still struggle in abject poverty. Yet the world’s richest countries continue to send money—mostly to governments—targeting the symptoms, rather than the root causes of poverty. We need a better solution. In Give Work, Leila Janah offers a much-needed solution to solving poverty: incentivize everyone from entrepreneurs to big companies to give dignified, steady, fair-wage work to low-income people. Her social business, Samasource, connects people living below the poverty line—on roughly \$2 a day—to digital work for major tech companies. To date, the organization has provided over \$10 million in direct income to tens of thousands of people the world had written off, dramatically altering the trajectory of entire communities for the better. Janah and her team go into the world’s poorest regions—from refugee camps in Kenya to the Mississippi Delta in Arkansas—and train people to do digital work for companies like Google, Walmart, and Microsoft. Janah has tested various Give Work business models in all corners of the world. She shares poignant stories of people who have benefited from Samasource’s work, where and why it hasn’t worked, and offers a blueprint to fight poverty with an evidence-based, economically sustainable model. We can end extreme poverty in our lifetimes. Give work, and you give the poorest people on the planet a chance at happiness. Give work, and you give people the freedom to choose how to develop their own communities. Give work, and you create infinite possibilities.

Further, it presents the technical issues to be considered under SAMA and the options to be analysed at the country and sub regional levels. The ten key elements required in a framework for SAMA are as follows: The analysis in the framework calls for a specific approach, involving learning from other parts of the world where significant transformation of the agricultural mechanization sector has already occurred within a three-to-four decade time frame, and developing policies and programmes to realize Africa's aspirations of Zero Hunger by 2025. This approach entails the identification and prioritization of relevant and interrelated elements to help countries develop strategies and practical development plans that create synergies in line with their agricultural transformation plans. Given the unique characteristics of each country and the diverse needs of Africa due to the ecological heterogeneity and the wide range of farm sizes, the framework avoids being prescriptive.
