Common F60 Fire Guard Test Questions and Their Answers

To help you succeed, let's explore some typical questions you might encounter, along with explanations that clarify the correct responses.

Question 1: What are the main classes of fire, and which extinguishers should be used on each?

Understanding fire classes is fundamental. The main classes include:

- **Class A:** Fires involving solid materials like wood, paper, and textiles. Use water or foam extinguishers.
- **Class B:** Fires with flammable liquids such as petrol or oil. Use foam, CO2, or dry powder extinguishers.

- **Class C:** Fires involving gases. Use dry powder extinguishers.

Knowing these distinctions helps in choosing the right firefighting method and avoiding dangerous mistakes.

Question 2: What are the immediate actions a fire guard should take upon discovering a fire?

The correct sequence typically includes:

1. Raising the alarm to alert everyone in the vicinity.
2. Calling the fire brigade or emergency services.
3. Attempting to extinguish the fire if it is safe to do so.
4. Evacuating people from the danger area following established procedures.

This order ensures safety comes first while minimizing damage.

Question 3: How often should fire safety equipment and alarms be checked?

Regular checks are crucial for effective fire safety. The general guideline is:

- Fire extinguishers should be inspected monthly and serviced annually.
- Fire alarms and detection systems require weekly or monthly functional tests, depending on regulations.
