Divided into two unique sections, Teach Yourself and Train Others, this book is perfect for individual teachers, middle leaders and those looking to introduce whole-school CPD training programmes. José Picardo's new book will consider how technology is used in schools and provide research-informed strategies to help improve teaching and learning by using technology effectively. It focuses on the need to train staff in the skills required to choose the right technology to have lasting impact and combines not only information about how technology can best work in the classroom, but also what makes great teaching and how technology can complement this. The goal of the book is to help teachers integrate technology seamlessly into daily practice so that technology is used almost reflexively, effectively and without fuss. It also provides guidance on how to integrate this methodology and way of thinking across your school as well as training other teachers to successfully choose and use the best technology for their subject and their students.
