america the story of us cities answer key: Global Movement Ruth Reitan, 2013-10-18 Critical research and theorizing on the Anti- or Alter-Globalization Movement has exploded over the last two decades. This volume provides a platform for scholar-activists themselves to share insights from engaged research and to critically reflect on movement histories and internal dynamics. It also highlights ways in which activists are reaching beyond their geographical and issue boundaries to work with others in struggle, to construct a broader global movement of the left--and beyond. Case studies span the social movement spectrum from more traditional concerns with class, the primacy of the labor movement, economic redistribution and justice, through the so-called 'new' movements of identity and post-materialist issues of peace, the environment, gender, and indigenous struggles, to the newest currents in (post-)autonomy, (post-)anarchism, and de- or anti-coloniality. Together these studies show that what began in Chiapas with the Zapatista cry of *basta ya!* as an 'anti-globalization' movement morphed for a time into 'alter-globalization' and 'global peace and justice', and may now be emerging as a counter-hegemonic project of and for global democratization. This book was published as a special issue of *Globalizations*.
