**holt biology johnson and raven online textbook: *EVOLUTION: A Grand Monument to Human Stupidity*** Daniel Jappah, 2007-09-01 The theory of evolution has changed so much- claiming that humans are closely related genetically to chimps, mice, donkeys, and even fish - that the theory is now a blurred mess masquerading as a scientific fact. It's a theory built on countless speculations, scientific fraud, and multiple conflicting theories. Garnering the evidence from biology, chemistry, genetics, geology, history, paleontology, and physics, evolution is exposed as a racist philosophy and a false science that provided the scientific justification for the Holocaust and other genocides, including the plot to silently exterminate American minorities through abortion and birth control. The evidence for evolution is examined in the light of genuine science. You may not like what you read, but you can't argue with the facts.
