journal of curriculum studies: Leaders in Curriculum Studies Leonard J. Waks, Edmund C. Short, 2009-01-01 In the 1950s and 1960s school teaching became a university-based profession, and scholars and policy leaders looked to the humanities and social sciences in building an appropriate knowledge base. By the mid-1960s there was talk about a "new" philosophy, history, and sociology of education. Curriculum thinkers such as Joseph Schwab, Dwayne Heubner and Paul Hirst initiated new intellectual projects to supplement applied work in curriculum. By the 1970s the field was in the process of re-conceptualization, as a new generation of scholars provided deep critical insights into the social, political and cultural dynamics of school experience and templates for renewal of curriculum research and practice. In this book, 18 leading curriculum scholars since 1970 who remain influential today present the fascinating stories of their lives and important new contributions to the field. They trace their early experiences in teaching and curriculum development, creative directions in their work, mature ideas and perceptions of future directions for the field. Each chapter contains a list of works chosen by the authors as their personal favorites.

journal of curriculum studies: Thinking About The Curriculum (Routledge Revivals) William A Reid, 2013-10-14 First published in 1978, this book looks at the 'curriculum crisis' of the

1970s, examining the effect it has had for Curriculum Studies and curriculum policy making. It focuses on a time when long-established structures and procedures were challenged and schools were accused of having lost touch with the wants and needs of communities. The author argues that the curriculum should become part of community interest and be led by this, rather than by professionals and initiates. Indeed, he feels that the curriculum must have an identity which avoids alliances with technocrats, bureaucrats or ideologues, but yet has a positive philosophy and a commitment to good values.

journal of curriculum studies: Handbook of Research in Social Studies Education Linda S.

Levstik, Cynthia A. Tyson, 2010-04-15 This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.

journal of curriculum studies: The SAGE Guide to Curriculum in Education Ming Fang He, Brian D. Schultz, William H. Schubert, 2015-06-05 The SAGE Guide to Curriculum in Education integrates, summarizes, and explains, in highly accessible form, foundational knowledge and information about the field of curriculum with brief, simply written overviews for people outside of or new to the field of education. This Guide supports study, research, and instruction, with content that permits quick access to basic information, accompanied by references to more in-depth presentations in other published sources. This Guide lies between the sophistication of a handbook and the brevity of an encyclopedia. It addresses the ties between and controversies over public debate, policy making, university scholarship, and school practice. While tracing complex traditions, trajectories, and evolutions of curriculum scholarship, the Guide illuminates how curriculum ideas, issues, perspectives, and possibilities can be translated into public debate, school practice, policy making, and life of the general public focusing on the aims of education for a better human condition. 55 topical chapters are organized into four parts: Subject Matter as Curriculum, Teachers as Curriculum, Students as Curriculum, and Milieu as Curriculum based upon the conceptualization of curriculum commonplaces by Joseph J. Schwab: subject matter, teachers, learners, and milieu. The Guide highlights and explicates how the four commonplaces are interdependent and interconnected in the decision-making processes that involve local and state school boards and government agencies, educational institutions, and curriculum stakeholders at all levels that address the central curriculum questions: What is worthwhile? What is worth knowing, needing, experiencing, doing, being, becoming, overcoming, sharing, contributing, wondering, and imagining? The Guide benefits undergraduate and graduate students, curriculum professors, teachers, teacher educators, parents, educational leaders, policy makers, media writers, public intellectuals, and other educational workers. Key Features: Each chapter inspires readers to understand why the particular topic is a cutting edge curriculum topic; what are the pressing issues and contemporary concerns about the topic; what historical, social, political, economic, geographical, cultural, linguistic, ecological, etc. contexts surrounding the topic area; how the topic, relevant practical and policy ramifications, and contextual embodiment can be understood by theoretical perspectives; and how forms of inquiry and modes of representation or expression in the topic area are crucial to develop understanding for and make impact on practice, policy, context, and theory. Further readings and resources are provided for readers to explore topics in more details.
