five ponds press teacher edition: Teaching White Supremacy Donald Yacovone, 2023-10-24 A powerful exploration of the past and present arc of America's white supremacy—from the country's inception and Revolutionary years to its 19th century flashpoint of civil war; to the Civil Rights movement of the 1960s and today's Black Lives Matter. "The most profoundly original cultural history in recent memory." —Henry Louis Gates, Jr., Harvard University "Stunning, timely . . . an achievement in writing public history . . . Teaching White Supremacy should be read widely in our roiling debate over how to teach about race and slavery in classrooms. —David W. Blight, Sterling Professor of American History, Yale University; author of the Pulitzer Prize-winning *Frederick Douglass: Prophet of Freedom* Donald Yacovone shows us the clear and damning evidence of white supremacy's deep-seated roots in our nation's educational system through a fascinating, in-depth examination of America's wide assortment of texts, from primary readers to college textbooks, from popular histories to the most influential academic scholarship. Sifting through a wealth of materials from the colonial era to today, Yacovone reveals the systematic ways in which this ideology has infiltrated all aspects of American culture and how it has been at the heart of our collective national identity. Yacovone lays out the arc of America's white supremacy from the country's inception and Revolutionary War years to its nineteenth-century flashpoint of civil war to the civil rights movement of the 1960s and today's Black Lives Matter. In a stunning reappraisal, the author argues that it is the North, not the South, that bears the greater responsibility for creating the dominant strain of race theory, which has been inculcated throughout the culture and in school textbooks that restricted and repressed African Americans and other minorities, even as Northerners blamed the South for its legacy of slavery, segregation, and racial injustice. A major assessment of how we got to where we are today, of how white supremacy has suffused every area of American learning, from literature and science to religion, medicine, and law, and why this kind of thinking has so insidiously endured for more than three centuries.

five ponds press teacher edition: *Studied Ignorance* Herbert N. Foerstel, 2013-05-23 Despite concerted efforts from our educators, administrators, and government, American education continues to struggle. The author of this work argues that the decline can be traced to censored curricula, inaccurate textbooks, test-driven evaluations, and increasing poverty among the student population. Under the definition of failure specified in the No Child Left Behind Act, more than 80 percent of American schools could currently be labeled as failing, while the quality of American education overall and our students' performance continue to rank unfavorably against international competition. This book examines the crisis in American education and identifies how weaknesses in textbooks, teaching, and testing have created the crisis facing American education—a topic that dramatically affects students, teachers, and parents. Author Herbert N. Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today. His book traces the legal basis for curricular censorship that dates back 75 years; identifies the bizarre process by which shoddy textbooks have been written, published, and come to be widely accepted; and documents the disastrous effect that reliance on these materials has had on the curriculum. Foerstel also supplies a careful assessment of the current political debate over education reform and of the proposed solutions to these problems.

five ponds press teacher edition: *The Extraordinary Adirondack Journey of Clarence Petty* Christopher Angus, 2015-02-25 Author and naturalist Christopher Angus profiles for the first time the adventurous life of Clarence Petty, one of the great pioneer conservationists of the Adirondack Mountain region of New York State. Raised in the heart of the Adirondack wilderness between Tupper and Saranac Lakes, Petty overcame his humble beginnings and pursued a variety of careers as wilderness guide, forester, Civilian Conservation Corps camp director, World War II pilot, district ranger, and aerial forest-fire fighter—ultimately leaving his indelible mark as a lifelong advocate for the protection of the wilderness. The story of Petty's life reads like a Horatio Alger novel. His father moved to the mountains in the 1880s to work as a guide. His mother was a cook for one of the popular sportsmen's hotels in the area. Young Clarence and his brothers enjoyed the kind of childhood freedom and independence that today's youngsters can only dream about. Their father's sense of self-reliance and their mother's drive to educate her sons led all three to attend college. Clarence followed a path of service to the American landscape. His influence on state policy regarding the Adirondack Park and especially its millions of acres of wilderness has been profound. His life story provides a window into the politics of conservation in the Adirondack region from the early days of the twentieth century to the present.

five ponds press teacher edition: *Mary Shepherd* Deborah Boyle, 2023 Scottish philosopher Lady Mary Shepherd (1777-1847) wrote two books that she conceived as one unified project: *Essay Upon the Relation of Cause and Effect* (1824) and *Essays on the Perception of an External Universe* (1827). While they were well received in her day, Shepherd's insightful philosophical writings have been neglected for some 150 years and are only now receiving the scholarly attention they deserve. *Mary Shepherd: A Guide* by Deborah Boyle, part of the Oxford Guides to Philosophy series, navigates students of philosophy or general readers through Shepherd's two significant works. The first four chapters address topics raised in the 1824 *Essay*: Shepherd's arguments for two key causal principles, her objections to Hume and her alternative accounts of causation and causal inference; her theory of objects as bundles of qualities; her critique of Thomas Brown's defence of Humean causation; and her discussion of London surgeon William Lawrence's accounts of sentience and life, which Shepherd treats as a case study of how Humean theory can lead to errors in scientific reasoning. Chapter 5 covers topics central to both of Shepherd's books: what she means by

sensation, idea, will, imagination, understanding, reasoning, and latent reasoning. The remaining five chapters proceed systematically through Shepherd's 1827 book, where she seeks to prove, against Berkeleian idealism, that we can know that an external world of mind-independent matter exists. Boyle discusses Shepherd's proofs for such an external world, her responses to various sceptical challenges, and her specific objections to Berkeley. Each chapter ends with a list of works for further reading and a glossary of terms that explain Shepherd's sometimes idiosyncratic philosophical vocabulary, resulting in an essential guide to a philosopher who exerted considerable influence during her time.
