The book exposes abuses and enslavement policies and attitudes in health care training programs and hospital administrations worldwide and offers simple and genius remedies to eradicate these deleterious policies and slave owner attitudes of hospital administrators. The book lays out a realistic pathway, achievable goals, and a potential glorious and auspicious destiny of worldwide improvement in the care of hospitalized patients, physicians morale, respect, and dignity, maintenance and perseverance of eternal zenith patient care and ethical and moral hospital administrations and individual hospital administrators behavior and policies in this generation and all future generations. The book elucidates essential key strategies to restore power, influence, dignity, and respect (all have been stripped from physician slaves by malevolent administrator slave owners), back to their rightful owners (and rightfully so, based on their education and training in the direct care of patients), who are those individual and independent contractor physician specialists (who admirably sacrifice their healthy sleep and rest time to compassionately care for the emergent needs of hospitalized patients at all inconvenient hours of the day and night in addition to their full-time weekly, busy work schedule, caring for their outpatient office practice patients). Dignity, respect and balance of power must be restored to independent physicians and other healthcare provider personnel throughout the world to emancipate these current slaves from their current slave owners and the current slave owner system. Emancipated slaves must then continue to be guided by ethical and moral singularity of purpose and intent, and be organized, supported, and defended by pro-independent healthcare providers powerful unions. Independent and emancipated healthcare providers will then be empowered and powerfully defended and willing and capable to continue the fight and battle for their new freedom, respect and dignity, each generation, against the ever-present threat of re-enslavement of independent healthcare providers by hospital administrators who may (and often) only have unethical, selfish fiscal, or avoid litigation goals instead of more highly admirable and desired intentions and goals of ethical and moral behavior, respecting physician independence, judgement and balance of power (versus hospital administrator's maleficent goals and aspirations), ultimately achieving the desired outcome and goal of realizing zenith patient care worldwide, all stemming from the long overdue emancipation of current Physician Slaves from their current hospital Adminis-Traitors or Slave Owners that has persisted for centuries, but now can and must be abolished, via enlightenment that inspires individuals to unite and act now on the recommendations in this book, adhering to the gestalt and paradigm shift brilliantly (proscribed by current and past slave owners) prescribed by this book's dynamic author.

100 medical school interview questions: Women and Depression Peter Horvath,

2013-10-18 The purpose of this book is to present a spectrum of women's experiences with depression. The book is unique in presenting both qualitative and quantitative studies on various stages of women's experiences with depression including its psychological and social antecedents, its adverse consequences, and the impact of psychological and community interventions. Our aim has been to present some of the recurrent themes and vital links in this chain of experiences. One such common theme has to do with the importance of acquiring and maintaining control over the evaluation of self-worth by the individual. Stressful circumstances and negative social encounters may produce the greatest harm and consequent depression by depriving individuals' control over the processes involved in the evaluation of self-worth. This book will be of interest to clinical psychologists, counsellors, psychiatrists, mental health practitioners and community service providers. This book was published as a special issue of the Journal of Prevention and Intervention in the Community.
