The Role of Sectionalism and Division in American History

To appreciate the value of the America Story of Us Division Worksheet, it's important to grasp the historical context it covers. The mid-19th century United States was marked by growing tensions between the North and South, fueled by disagreements over slavery, economic interests, and political power.

Sectionalism: The Root of Division

Sectionalism refers to loyalty to a particular region or section of a country rather than to the country as a whole. In the U.S., this manifested as the North and South developing distinct economies and social systems—the industrialized North versus the agrarian South reliant on slave labor. This divergence created competing worldviews and political agendas.

The worksheet often highlights events illustrating sectionalism, such as:

- The Compromise of 1850 and the Fugitive Slave Act
- The Kansas-Nebraska Act leading to "Bleeding Kansas"
- The rise of the Republican Party opposing the expansion of slavery

Understanding sectionalism helps learners see how these deeply rooted conflicts escalated toward civil war.

Major Events Covered in the Worksheet

The America Story of Us Division Worksheet typically covers several key milestones, including:

- **The Missouri Compromise (1820):** A legislative attempt to balance slave and free states.
- **The Dred Scott Decision (1857):** Supreme Court ruling denying citizenship to African Americans and fueling abolitionist outrage.
- **John Brown's Raid on Harpers Ferry (1859):** A radical anti-slavery act that polarized the nation.
- **The Election of 1860:** Abraham Lincoln's victory, seen as a threat by the South, triggering secession.

By exploring these events through focused questions, learners gain insight into the complexities that led to the division and eventual conflict.

But when Kolb begins to connect the dots, he realizes something even more sinister is afoot, and that he's on to the biggest possible con with the highest political stakes. america story of us division worksheet: *Citizens of the World* Megan Threlkeld, 2022-05-10 Between 1900 and 1950, many internationalist U.S. women referred to themselves as citizens of the world. This book argues that the phrase was not simply a rhetorical flourish; it represented a demand to participate in shaping the global polity and an expression of women's obligation to work for peace and equality. The nine women profiled here invoked world citizenship as they promoted

world government—a permanent machinery to end war, whether in the form of the League of Nations, the United Nations, or a full-fledged world federation. These women agreed neither on the best form for such a government nor on the best means to achieve it, and they had different definitions of peace and different levels of commitment to genuine equality. But they all saw themselves as part of a global effort to end war that required their participation in the international body politic. Excluded from full national citizenship, they saw in the world polity opportunities for engagement and equality as well as for peace. Claiming world citizenship empowered them on the world stage. It gave them a language with which to advocate for international cooperation. Citizens of the World not only provides a more complete understanding of the kind of world these women envisioned and the ways in which they claimed membership in the global community. It also draws attention to the ways in which they were excluded from international institution-building and to the critiques many of them leveled at those institutions. Women's arguments for world government and their practices of world citizenship represented an alternative reaction to the crises of the first half of the twentieth century, one predicated on cooperation and equality rather than competition and force.
