

health promotion practice impact factor

Health Promotion Practice Impact Factor: Understanding Its Role and Significance

health promotion practice impact factor is a term that frequently comes up among researchers, practitioners, and academics involved in public health and community wellness initiatives. For those engaged in health promotion, understanding the impact factor of journals like Health Promotion Practice is vital, as it not only reflects the journal's influence in the field but also guides authors in selecting the right platform to share their research. In this article, we'll explore what the health promotion practice impact factor means, why it matters, and how it fits into the broader landscape of health promotion and public health research.

What Is the Health Promotion Practice Impact Factor?

The impact factor is a metric used to measure the average number of citations to articles published in a specific journal. Specifically, the health promotion practice impact factor indicates how frequently articles from the Health Promotion Practice journal are cited in other research works within a given timeframe, usually two years. This number serves as an indicator of the journal's prestige, relevance, and the extent to which its content influences ongoing research and practice in the health promotion field.

Why Impact Factor Matters in Health Promotion Research

For researchers and professionals in health promotion, publishing in a journal with a respectable impact factor can enhance the visibility of their work. It often reflects the quality and rigor of the articles published, which means that studies appearing in such journals are more likely to be trusted and referenced by others. This can lead to greater dissemination of effective health promotion strategies, ultimately influencing public health policies and community interventions.

Moreover, institutions and funding bodies sometimes use impact factors as one of the criteria for evaluating the merit of an academic's publications. Hence, understanding the health promotion practice impact factor can help researchers make strategic decisions about where to submit their manuscripts.

Factors Affecting the Health Promotion Practice Impact Factor

The impact factor isn't just a random number; several elements influence it. Understanding these can help authors and readers appreciate how the metric is derived and what it truly signifies.

Quality and Relevance of Published Articles

High-quality, innovative research that addresses pressing health promotion challenges tends to attract more citations. Articles that offer practical insights, novel interventions, or systematic reviews often become reference points for future studies, boosting the journal's impact factor.

Editorial Standards and Peer Review Process

A rigorous peer review process ensures that only well-designed studies with sound methodology are published. Journals like Health Promotion Practice maintain strict editorial standards to uphold their reputation, which directly affects citation rates.

Timeliness and Accessibility

Publishing timely research that aligns with current global or local health concerns can lead to higher citation rates. Additionally, journals that offer open access or wider availability of their content generally see more citations because their articles reach a broader audience.

Comparing Health Promotion Practice Impact Factor With Other Journals

In the field of health promotion and public health, several journals compete for attention. While Health Promotion Practice is a significant player, understanding how its impact factor compares to other journals can give insights into its standing.

Popular Journals in Health Promotion

- American Journal of Public Health
- Health Education & Behavior
- Journal of Health Promotion and Education
- Preventive Medicine

Each of these journals has its unique scope and audience, which influences their impact factors differently. For example, American Journal of Public Health often has a higher impact factor due to its broad public health focus and longstanding reputation.

Why Choose Health Promotion Practice?

Despite variations in impact factors, Health Promotion Practice offers a specialized platform dedicated to the practical application of health promotion strategies. Its focus on translating research into

practice makes it an essential resource for practitioners who want to implement evidence-based interventions in communities.

How to Leverage the Health Promotion Practice Impact Factor for Career Growth

For health promotion professionals and academics, publishing in journals with a notable impact factor can be a game-changer. Here's how you can use the health promotion practice impact factor to your advantage:

Strategic Publication Planning

Understanding the impact factor helps you identify journals that will give your research maximum exposure. By targeting Health Promotion Practice, you align with a publication that reaches practitioners and policymakers who can apply your findings directly.

Enhancing Grant Applications and Funding Opportunities

When applying for research funding, demonstrating that your previous work has been published in high-impact journals can strengthen your proposals. Funding bodies often look for evidence that your research contributes meaningfully to the field.

Building Professional Credibility

Consistently publishing in reputable journals builds your profile as a credible expert. The health promotion practice impact factor symbolizes that the community values the journal and, by extension, your contributions.

Beyond Impact Factor: Other Metrics to Consider

While the health promotion practice impact factor is important, it's not the only measure of a journal's quality or influence. Other metrics provide a more nuanced understanding.

h-Index and CiteScore

The h-index measures both the productivity and citation impact of an author or journal. Similarly, CiteScore looks at citations over a three-year period, offering an alternative to the traditional impact factor.

Altmetrics

Altmetrics track the attention an article receives online, including social media mentions, news coverage, and downloads. These metrics can highlight the real-world impact of health promotion research beyond academic citations.

Peer Reputation and Community Engagement

Sometimes, the perceived value of a journal within a professional community matters more than numbers. Health Promotion Practice is known for its practitioner-oriented articles and case studies, which may have a profound impact on local health initiatives even if citation counts are moderate.

Tips for Selecting the Right Journal in Health Promotion

If you're considering submitting your work to Health Promotion Practice or similar journals, keep the following tips in mind:

- **Match Your Manuscript's Focus:** Ensure your research aligns with the journal's scope, emphasizing practical health promotion strategies and community impact.
- **Review Recent Publications:** Look at the types of articles the journal publishes to understand its priorities and style.
- **Consider Open Access Options:** Increasingly, open access articles receive more attention and citations.
- **Check Submission Guidelines:** Follow the journal's formatting and ethical guidelines carefully to avoid delays.

Understanding the health promotion practice impact factor and the context behind it empowers researchers and practitioners to make informed decisions about where to share their work and how to interpret the influence of published studies. As health promotion continues to evolve, staying attuned to these metrics will help advance both individual careers and the broader goal of improving community health outcomes.

Frequently Asked Questions

What is the impact factor of the journal Health Promotion Practice?

As of the latest available data, the impact factor of Health Promotion Practice is approximately 2.0, reflecting its influence in the field of public health and health promotion research.

How is the impact factor of Health Promotion Practice calculated?

The impact factor is calculated by dividing the number of citations in a given year to articles published in the journal during the previous two years by the total number of articles published in those two years.

Why is the impact factor important for Health Promotion Practice?

The impact factor indicates the journal's reputation and influence in the academic community, helping researchers decide where to publish and readers to identify high-quality research.

Where can I find the current impact factor of Health Promotion Practice?

Current impact factors can be found on indexing platforms like Journal Citation Reports (JCR) by Clarivate Analytics or on the journal's official website.

Does a higher impact factor mean Health Promotion Practice publishes better research?

A higher impact factor generally indicates more frequent citations and influence, but it does not solely determine the quality of individual articles, which should be evaluated on their own merits.

How does Health Promotion Practice's impact factor compare to other public health journals?

Health Promotion Practice has a moderate impact factor compared to top-tier public health journals, reflecting its specialized focus on practical health promotion interventions.

Can the impact factor of Health Promotion Practice change over time?

Yes, the impact factor can vary annually based on citation trends, publication volume, and the relevance of published research.

Are there alternative metrics to impact factor for evaluating

Health Promotion Practice?

Yes, alternative metrics include the h-index, Scopus CiteScore, Altmetric scores, and article-level metrics that provide a broader evaluation of journal and article impact.

Additional Resources

Health Promotion Practice Impact Factor: A Critical Examination of Its Role in Public Health Scholarship

health promotion practice impact factor serves as a pivotal metric within the academic and professional domains of public health, particularly in evaluating the influence and reach of scholarly journals in health promotion. As public health continues to evolve with emerging challenges and innovative interventions, understanding the significance of the health promotion practice impact factor is essential for researchers, practitioners, and policymakers alike. This article delves into the nuances of this metric, unpacking its relevance, limitations, and the broader context surrounding its use in the field of health promotion.

Understanding the Health Promotion Practice Impact Factor

The impact factor is a widely recognized bibliometric indicator that quantifies the average number of citations received by articles published in a specific journal during a defined period, typically two years. In the context of health promotion, the health promotion practice impact factor is used to gauge the scholarly influence of journals that publish empirical studies, theoretical analyses, and case reports related to health promotion activities, interventions, and policies.

This metric is often leveraged by academics to determine where to submit manuscripts, by institutions assessing research productivity, and by funding bodies evaluating the dissemination potential of projects. Journals with higher impact factors are generally perceived as more prestigious and authoritative, potentially offering greater visibility to authors and their work.

The Role of Health Promotion Practice Impact Factor in Academic Publishing

Health promotion practice emphasizes the application of strategies and interventions to improve health outcomes at individual and community levels. Journals dedicated to this specialty, such as **Health Promotion Practice**, focus on translating research into actionable public health initiatives. The impact factor for such journals reflects not only the scientific rigor but also the practical relevance of the studies published.

Authors targeting journals with a strong health promotion practice impact factor are often motivated by the prospect of reaching a wider audience, including practitioners who implement health interventions. This dual audience—researchers and practitioners—makes the impact factor a key

consideration, as it indicates the journal's ability to influence both scholarly discourse and real-world health outcomes.

Comparing Impact Factors Across Health Promotion Journals

When evaluating journals within the health promotion domain, impact factors vary considerably based on scope, audience, and publication frequency. For example, journals focusing exclusively on theoretical frameworks may have different citation patterns compared to those emphasizing community-based participatory research or policy analysis.

A comparison of several prominent journals reveals:

- **Health Promotion Practice:** Known for applied research and practical insights, its impact factor typically ranges in the moderate spectrum, reflecting its niche but influential role.
- **Health Education & Behavior:** Often featuring both theoretical and empirical studies, this journal usually commands a higher impact factor due to broader citation appeal.
- **American Journal of Health Promotion:** Balances clinical and community health perspectives, with an impact factor that underscores its interdisciplinary reach.

Such comparisons are beneficial for authors deciding where to publish and for readers seeking authoritative sources on health promotion practices.

Limitations and Criticisms of the Impact Factor in Health Promotion

While the health promotion practice impact factor offers useful insights into journal influence, it is not without criticism. Some of the key limitations include:

1. **Short Citation Window:** The traditional two-year citation period may not adequately capture the long-term impact of health promotion research, which often unfolds over extended timelines.
2. **Disciplinary Bias:** Journals in niche areas or those publishing qualitative and community-based research may receive fewer citations, skewing impact factor comparisons.
3. **Overemphasis on Quantitative Metrics:** Relying heavily on impact factors can overshadow other important aspects like research quality, societal relevance, and practical implementation.

These critiques have prompted calls within the public health community to adopt more holistic evaluation methods that complement the impact factor.

Alternative Metrics and Emerging Trends

In response to the shortcomings of traditional impact factors, several alternative metrics have gained traction within health promotion research:

Altmetrics

Altmetrics track the online attention that scholarly articles receive, including mentions on social media, news outlets, blogs, and policy documents. This approach captures real-time engagement and the broader societal influence of health promotion studies, which is particularly relevant for practice-oriented research.

h-Index and Author-Level Metrics

Beyond journal-level impact factors, author-centric metrics like the h-index provide insights into individual researchers' productivity and citation impact. These metrics can complement journal impact factors when assessing the dissemination and influence of health promotion scholarship.

Qualitative Assessments

Peer reviews, expert panels, and case studies evaluating the practical implementation of research findings are increasingly recognized as valuable indicators of impact. These approaches highlight how health promotion research translates into community health improvements and policy changes, aspects not captured by citation-based metrics.

Implications for Researchers and Practitioners

Understanding the health promotion practice impact factor is crucial for several stakeholders:

- **Researchers:** Awareness of impact factors aids in strategic journal selection to maximize visibility and influence, but should be balanced with considerations of audience relevance and open-access availability.
- **Practitioners:** Journals with strong impact factors often disseminate evidence-based interventions that can be adapted in community settings, making them valuable resources for public health implementation.

- **Institutions and Funders:** Impact factors serve as one component in evaluating research outputs but should be integrated with qualitative assessments and societal impact measures to inform funding and promotion decisions.

By contextualizing the health promotion practice impact factor within a broader evaluative framework, stakeholders can better appreciate the multifaceted nature of research impact.

Future Directions in Health Promotion Research Evaluation

The dynamic landscape of public health demands that evaluation metrics evolve accordingly. Integrating digital tools and data analytics offers promising avenues for capturing the real-world effects of health promotion interventions. Furthermore, fostering collaborations between researchers, practitioners, and communities can enhance the relevance and applicability of published findings, potentially influencing traditional measures like impact factors.

Innovations such as open science practices, preprint servers, and collaborative platforms are reshaping how health promotion knowledge is disseminated and assessed. These trends suggest that while the health promotion practice impact factor remains a useful benchmark, it will increasingly coexist with diverse metrics capturing the complexity of research influence.

In sum, the health promotion practice impact factor is a significant yet nuanced indicator within public health scholarship. Its proper interpretation requires an understanding of its methodological foundations, contextual relevance, and limitations. As health promotion continues to address complex population health challenges, the metrics used to evaluate its scholarly output must adapt to reflect the field's evolving priorities and impact pathways.

Health Promotion Practice Impact Factor

health promotion practice impact factor: *Youth-led Health Promotion in Urban Communities* Melvin Delgado, Huiquan Zhou, 2008 The introduction of innovative social paradigms that stress community-participation, community-focused empowerment, assets, social and economic justice themes, and in the case of youth, civic participation, represents one of the outcomes of this questioning and bodes well for current and future generations. The subject of how best to address the current and future health needs of this country's urban marginalized communities is one that has also received considerable attention in academic, policy, and practice arenas in the past decade. A variety of models have been put forth to achieve the goal of health in these communities. One of the most promising recommendations has been the use of health promotion as a vehicle for reaching and empowering communities of color in both rural and urban America. The youth-led environmental justice movement, as it will be addressed in various sections of this book, is one of the latest and most promising approaches towards health promotion that is grass-roots and community participatory based. Youth-led health promotion represents an emerging field with tremendous implications for addressing the health needs of marginalized urban youth of color in the United States.

health promotion practice impact factor: *Health Promotion in Canada, Fifth Edition* Ann Pederson, Josée Lapalme, Katherine L. Frohlich, Olivier Ferlatte, Sophie Dupéré, 2025-08-25 Health

Promotion in Canada offers a comprehensive profile of the history, current landscape, and future directions of health promotion in Canada. Emphasizing the links between theory, research, policy, and practice, this engaging series draws on concrete Canadian examples that bring the concepts and content to life and introduces new perspectives on critical issues such as 2S/LGBTQIA+ health, planetary health, climate justice, and community-centered approaches to resilience. This new edition continues the critical approach of the previous four editions while offering an in-depth analysis of recent developments and innovative approaches in health promotion along with explorations of topical issues. With 20 new chapters, this edited collection contains contributions by prominent Canadian academics, researchers, and practitioners, reflecting a commitment to advancing well-being in a rapidly changing world while addressing the pressing challenges and opportunities shaping the field today. The fifth edition also offers fresh insights on topics such as the post-COVID health landscape, Indigenous health promotion, and mental health as well as updated discussions on health equity, digital health. Featuring learning objectives, case studies, thought-provoking discussion questions, resources for further study, and accompanying supplementary resources, this is an ideal textbook for courses in public health, health promotion and education, health sciences, nursing, and related disciplines.

health promotion practice impact factor: International Handbook of Teaching and Learning in Health Promotion Marco Akerman, Ana Claudia Camargo Gonçalves Germani, 2022-06-22 This international handbook brings together researchers and teachers from 25 countries of the five continents to share their experiences of teaching health promotion in undergraduate and graduate courses related to different health professions. Chapter authors share teaching methodologies used in classes, discuss the competencies students need to learn and indicate research opportunities. Readers will be provided with real-world examples of empowering, participatory, holistic, intersectoral, equitable and sustainable teaching/learning strategies that aim to improve health and reduce health inequities. This handbook was edited by an editorial board formed by 12 members of the International Union for Health Promotion and Education (IUHPE) from seven countries – Brazil, Belgium, Canada, Israel, New Zealand, Taiwan and UK –, and includes 45 chapters organized in seven thematic sections, each one dedicated to a different aspect of the process of teaching and learning health promotion: The health promotion curriculum Making health promotion relevant to practice Pedagogies for health promotion Special topics for health promotion Health promotion assessment and quality assurance Health promotion as a transformational practice Students' reflections The International Handbook of Teaching and Learning in Health Promotion: Practices and Reflections from Around the World aims to encourage a dialogue between teaching and learning practices carried out locally and the possibilities of replicating these experiences globally, recognizing cultural differences and similarities. This handbook is intended for a wide range of readers, including education and training providers, health professionals and health care students. Due to its intersectoral and interdisciplinary approach, it will also be of interest to teachers and students in other fields of the Social Sciences, such as Urban Planning, Social Work, Public Policy, International Relations and Population Studies.

health promotion practice impact factor: Health Promotion Nova Corcoran, 2023-12-21 Health Promotion: The Basics introduces not only the fundamental theories and key concepts within this important area of health and social care, but translates these into practice for anyone working in the field. The chapters are structured around the WHO's Ottawa Charter (1986) which underpins the discipline, and cover a comprehensive range of topics. From developing personal skills to understanding government policy, the book looks at health promotion on both an individual and a societal level. It spotlights key topic areas from behaviour change to climate change, as well as exploring how where we live impacts our health, and features practical examples for integrating health promotion into existing service provision and through community action. Including case studies throughout, and further reading for those wishing to explore specific topics, this is the perfect introduction to what health promotion means and how it can improve everyday lives.

health promotion practice impact factor: *Health Promotion* Jackie Green, Keith Tones,

2010-02-15 Beginning with a critical appraisal of the concept itself, the second edition of *Health Promotion: Planning and Strategies* outlines models for defining 'health promotion' and sets out the factors involved in planning health promotion programmes that work. Locating the principles and strategies of health promotion within an emerging sphere of multidisciplinary health, the authors show how these can be applied within a range of contexts and settings. In an attempt to bridge the gap that persists between ideological perspectives and practical implementations, they delve beyond the rhetoric of empowerment and show how it can be incorporated into practice. Focusing particularly on the synergistic relationship between policy and education, the book re-appraises the notion of health education - an idea which has become marginalised in recent years- and shows the fundamental importance of education in creating individual choice and generating effective advocacy for social change. The question of 'evidence' is central to the text and the book examines methods of evaluation and the role it plays in creating more effective health promotion programmes. The new edition offers coverage of values and ethics; working with communities; the settings approach, and social marketing. It also provides students with a glossary of key terms. Internationally relevant and multidisciplinary, this is an essential text for students of health studies, health promotion, public health, interprofessional social care courses, and all healthcare professionals.

health promotion practice impact factor: *Health Promotion Theory* Cragg, Liza, Davies, Maggie, Macdowall, Wendy, 2013-10-01 This fully updated edition will help students and professionals develop an understanding of the core health promotion theories.

health promotion practice impact factor: *Planning, Implementing and Evaluating Health Promotion Programs with Navigate Advantage Access* James F. McKenzie, Brad L Neiger, Rosemary Thackeray, 2022-07-18 This book is written for students who are enrolled in their first professional course in health promotion program planning. It is designed to help them understand and develop the skills necessary to carry out program planning regardless of the setting. This book is unique among the health promotion planning textbooks on the market in that it provides readers with both theoretical and practical information--

health promotion practice impact factor: *Health Promotion and Aging* David Haber, 2003 Focusing on research findings and practical applications, the author, in this new edition, continues to stress the importance of collaboration and communication between health professionals and their clients. The book is based on the premise that health professionals should be health educators.

health promotion practice impact factor: *Evaluation and Measurement in Health Promotion* Manoj Sharma, R. Lingyak Petosa, 2023-02-07 A thorough and accessible introduction to data collection, analysis, and reporting for the health promotion field *Evaluation and Measurement in Health Promotion* guides current and future health promoters in becoming experimenting practitioners who take a data-driven approach to decision making. Through this model, professionals can create innovative health programs rooted in measured fact. Such programs must be continuously evaluated and improved upon, and this book covers both the measurement and evaluation stages. The result is a comprehensive model that takes a rigorous approach to the health promotion process, its concrete impact in the world, and the evaluation of its outcomes. Topics covered include: evaluation planning; measurement/instrument development; reliability/validity assessment; evaluation design; approaches to qualitative evaluation; data analysis/interpretation and report writing. Health promotion is essential to improve community health and prevent disease. In the field of health promotion, we empower individuals and communities to prevent health problems and pursue quality of life by addressing behavioral and social determinants of health. For those looking for a framework to approach the goals of health promotion—including those taking the CHES, MCHES, or CPH exams—this straightforward book is a valuable resource. Get an introduction to the field of health promotion and the process of evaluating health promotion programs Develop rigorous instruments for measuring various types of outcomes in health promotion programs Assess the reliability and validity of evaluation instruments, and address measurement errors Conduct quantitative analysis and qualitative data analysis, and write effective

research reports This book includes tools to help both instructors and learners, including succinct chapter introductions and summaries, practical skill-building activities, fascinating real-life case studies, a glossary, review questions, web exercises, and instructor resources.

health promotion practice impact factor: *Global Handbook of Health Promotion Research, Vol. 1* Louise Potvin, Didier Jourdan, 2022-05-13 While research teams are producing relevant and valid knowledge for health promotion, there is not yet a structured manual and distinct field of health promotion research. This timely state-of-the-art handbook contributes to the structuring of such a field of research. This collection of original contributions explores the major epistemological, methodological, and ethical challenges facing health promotion research. It brings together experts from different research traditions that coexist in the field. The handbook covers the existing knowledge production and sharing practices to delineate the discipline and its agenda for future research. Ultimately, it contributes to the creation of a global community of health promotion researchers. The handbook is organized by four types of practices (what people actually do) studied in health promotion; the practices of: Individuals and populations in relation to their health and its determinants Professionals who intervene to improve population health Policy-makers and institutions involved in the advocacy, design, and implementation of policies and programs Researchers and innovators (academic scholars and global agencies) through which investment in research and production of evidence-based guidelines are made. *Global Handbook of Health Promotion Research, Vol. 1: Mapping Health Promotion Research* is a highly relevant reference tool for researchers and graduate students in health promotion, public health, education and socio-health sciences; practitioners in health, medical, and social sectors; policy-makers; and health research administrators.

health promotion practice impact factor: *Global Perspectives on Health Promotion Effectiveness* David V. McQueen, Catherine Jones, 2007-06-13 As health improvement initiatives take center stage worldwide, public health professionals face an ongoing challenge to prove that the programs are worthwhile and that interventions make an impact. The Global Programme on Health Promotion Effectiveness (GPHPE) of the International Union for Health Promotion and Education takes on this challenge in *Global Perspectives on Health Promotion Effectiveness*. Fifty-five contributors representing six continents come together to analyze major programs around the world and evaluate their effectiveness. The result is a symposium in a book, the first in a series, representing the best critical thinking on crucial issues such as these: Assessment of evidence and evaluation of effectiveness in an international context. Synthesis of progress on the various GPHPE regional projects, with candid evaluations of strengths and limitations, and factors unique to each region. Advocacy to strengthen the evidence base for mental health promotion, physical activity promotion and a wide range of settings-based health promotion interventions. Challenges to health promotion and its assessment, including peace-building, urbanization, globalization, and social determinants. Global debates on emerging health promotion arenas—equity, methodology, partnership, development in adverse political climates, and others—as to whether or not traditional concepts of evidence, impact, and outcomes can be applied. *Global Perspectives on Health Promotion Effectiveness* is a significant document with profound implications for practitioners involved in implementing health promotion programs. It will serve as a vital source of frontline knowledge for researchers and students of public health.

health promotion practice impact factor: *Health Promotion For People With Intellectual And Developmental Disabilities* Taggart, Laurence, Cousins, Wendy, 2014-01-01 This book offers a wide range of health and social care professionals, the knowledge and strategies to address key issues, enabling and empowering individuals with intellectual disabilities to enjoy healthier lives.

health promotion practice impact factor: *Handbook of Health Behavior Research IV* David S. Gochman, 2013-06-29 Volume 4 considers the importance of health behavior research in practical settings. Particularly notable are treatments of the narrative approach, the taxonomy of health behavior, and the organization of health behavior knowledge. Each volume features extensive supplementary and integrative material prepared by the editor, the detailed index to the entire

four-volume set, and a glossary of health behavior terminology.

health promotion practice impact factor: *Knowledge Translation in Context* Elizabeth M. Banister, Bonnie Leadbeater, Anne Marshall, 2011-03-01 The main goal of knowledge translation (KT) is to ensure that diverse communities benefit from academic research results through improved social and health outcomes. But despite growing interest in researcher-user collaborations, little is known about what makes or breaks these types of relationships. *Knowledge Translation in Context* is an essential tool for researchers to learn how to be effective partners in the KT process. Drawing on expertise and studies from across the globe, Elizabeth Banister, Bonnie Leadbeater, and Anne Marshall outline a variety of perspectives on KT processes. Case studies outline the uses of KT in many contexts, including community, policy, Indigenous, and non-profit organizations. While recognizing the specificity of each situation, *Knowledge Translation in Context* highlights the most important elements that have led KT to succeed (or fail) as a dynamic, multidirectional process.

health promotion practice impact factor: *ACSM's Worksite Health Handbook* American College of Sports Medicine, 2009-02-27 Encouraging and maintaining a healthy workforce have become key components in the challenge to reduce health care expenditures and health-related productivity losses. As companies more fully realize the impact of healthy workers on the financial health of their organization, health promotion professionals seek support to design and implement interventions that generate improvements in workers' health and business performance. The second edition of *ACSM's Worksite Health Handbook: A Guide to Building Healthy and Productive Companies* connects worksite health research and practice to offer health promotion professionals the information, ideas, and approaches to provide affordable, scalable, and sustainable solutions for the organizations they serve. Thoroughly updated with the latest research and expanded to better support the business case for worksite programs, the second edition of *ACSM's Worksite Health Handbook* includes the contributions of nearly 100 of the top researchers and practitioners in the field from Canada, Europe, and the United States. The book's mix of research, evidence, and practice makes it a definitive and comprehensive resource on worksite health promotion, productivity management, disease prevention, and chronic disease management. *ACSM's Worksite Health Handbook, Second Edition*, has the following features: -An overview of contextual issues, including a history of the field, the current state of the field, legal perspectives, and the role of health policy in worksite programs -A review of the effectiveness of strategies in worksite settings, including economic impact, best practices, and the health-productivity relationship -Information on assessment, measurement, and evaluation, including health and productivity assessment tools, the economic returns of health improvement programs, and appropriate use of claims-based analysis and planning -A thorough discussion of program design and implementation, including the application of behavior change theory, new ways of using data to engage participants, use of technology and social networks to improve effectiveness, and key features of best-practice programs -An examination of various strategies for encouraging employee involvement, such as incorporating online communities and e-health, providing incentives, using medical self-care programs, making changes to the built environment, and tying in wellness with health and safety The book includes a chapter that covers the implementation process step by step so that you can see how all of the components fit together in the creation of a complete program. You'll also find four in-depth case studies that offer innovative perspectives on implementing programs in a variety of work settings. Each case study includes a profile of the company, a description of the program and the program goals, information on the population being served, the results of the program, and a summary or discussion of the program. Throughout the book you'll find practical ideas, approaches, and solutions for implementation as well as examples of best practices and successful programs that will support your efforts in creating interventions that improve both workers' health and business performance. The book is endorsed by the International Association for Worksite Health Promotion, a new ACSM affiliate society. Deepen your understanding of the key issues and challenges within worksite health promotion and find the most current research and practice-based information and approaches inside *ACSM's Worksite Health Handbook: A Guide to Building Healthy and Productive Companies, Second*

Edition. The e-book for ACSM's Worksite Health Handbook, Second Edition, is available at a reduced price. It allows you to highlight, take notes, and easily use all the material in the book in seconds. The e-book is delivered through Adobe Digital Editions® and when purchased through the Human Kinetics site, access to the content is immediately granted when your order is received. Adobe Digital Editions® System Requirements Windows -Microsoft® Windows® 2000 with Service Pack 4, Windows XP with Service Pack 2, or Windows Vista® (Home Basic 32-bit and Business 64-bit editions supported) -Intel® Pentium® 500MHz processor -128MB of RAM -800x600 monitor resolution Mac PowerPC -Mac OS X v10.4.10 or v10.5 -PowerPC® G4 or G5 500MHz processor -128MB of RAM Intel® -Mac OS X v10.4.10 or v10.5 -500MHz processor -128MB of RAM Supported browsers and Adobe Flash versions Windows -Microsoft Internet Explorer 6 or 7, Mozilla Firefox 2 -Adobe Flash® Player 7, 8, or 9 (Windows Vista requires Flash 9.0.28 to address a known bug) Mac -Apple Safari 2.0.4, Mozilla Firefox 2 -Adobe Flash Player 8 or 9 Supported devices -Sony® Reader PRS-505 Language versions -English -French -German

health promotion practice impact factor: Introduction to Epidemiology Ray Merrill, 2010-01-12 Introduction to Epidemiology, Fifth Edition is a reader-friendly exploration of the basic principles of epidemiology and their application in solving current public health issues. Readers will learn how to identify and describe problems, formulate research hypotheses, select appropriate research study designs, manage and analyze epidemiologic data, interpret study results, and apply the results to prevent and control disease and health-related events. The Fifth Edition is a thorough revision that gives greater attention to real-world, contemporary public health problems involving both infectious and chronic diseases and conditions, making it an ideal introductory text for the epidemiology student with minimal training in the biomedical sciences and statistics.

health promotion practice impact factor: The Oxford Handbook of Advice Erina L. MacGeorge, Lyn M. Van Swol, 2018 Advice, defined as a recommendation for action in response to a problem, is a common form of interpersonal support and influence. Indeed, the advice we give and receive from others can be highly consequential, not only affecting us as recipients and advisors, but shaping outcomes for relationships, groups, and organizations. Some of those consequences are positive, as when advice promotes individual problem-solving, or enhances workgroup productivity. Yet advice can also hide ulterior motives, threaten identity, damage relationships, and promote inappropriate action. The Oxford Handbook of Advice provides a broad perspective on how advice succeeds and fails, systematically reviewing and synthesizing theory and research on advice from multiple disciplines, such as communication, psychology, applied linguistics, business, law, and medicine. Several chapters explore advice at different levels of analysis, focusing on advisor and recipient roles, advising interactions and relationships, and advice as a resource and connection in groups and networks. Other chapters address advice in particular types of personal relationships (romantic, family) and professional contexts (workplace, health, education, therapy). Contributing authors also consider cultural differences, advice online, and the ethics of advising. For scholars concerned with supportive communication, interpersonal influence, decision-making, social networks, and related communication processes at work, at home, and in society at large, this Handbook offers historical perspective, contemporary theoretical framing, methodological recommendations, and directions for future research. It also emphasizes practical application, offering clear, concise, and relevant advice for advising based on theory and research.

health promotion practice impact factor: Health Promotion Throughout the Life Span - E-Book Carole Edelman, Elizabeth C. Kudzma, 2021-11-12 Health Promotion Throughout the Life Span - E-Book

health promotion practice impact factor: Implementing Universal Social-Emotional Programs Gary E. Schaffer, Stacy L. Bender, 2022-12-09 Implementing Universal Social-Emotional Programs is a step-by-step guide for educators and school-based mental health professionals seeking to effectively select, employ, and evaluate universal social-emotional programs using implementation science. With one out of five children having diagnosable mental health challenges and many more of our youth developing social-emotional concerns, today's schools must be able to effectively plan

and implement evidence-based programs that promote social-emotional learning and positive academic outcomes. This book accompanies practitioners and graduate students in teaching, school psychology, counseling, social work, education, and administration through each stage of implementation science, common programs and screeners, the purpose and selection process of implementation teams, and schools' expectations for fidelity, timeline, and budget. Throughout, the authors provide graphic organizers, diagrams, activities, exercises, vignettes, checklists, templates, charts, and other interactive features for active engagement.

health promotion practice impact factor: Using Web 2.0 for Health Information Paula Younger, Peter Morgan, 2011 Working together is a particular strength of information professionals in all sectors. In the area of health information in particular, the potential for using the internet for collaborative working is immense. Since it was first formally described in 2004, what is currently known as Web 2.0 has affected every library and information sector. Web 2.0 has tremendous potential to transform health information delivery still further. Although there have been any individual articles examining Web 2.0 applications and methods of working, and there are many individual examples of best practice, substantive works that synthesise this experience in one volume are rare. This new book is designed to meet this need, by drawing together international case studies and reflections on using Web 2.0. The book blends practical insights, theory and reflective approaches to offer a cohesive overview of how Web 2.0 is already changing health and medical information work. Main strands include: enhancing medical, nursing and health education information literacy in a health information environment supporting research supporting clinical care developing a service presence using Web 2.0 using social networking to develop an outreach service. Readership: Although the focus of the book is health information, it would be relevant to anyone who would like to gain an insight into this innovative and cost-effective method of delivering and sharing information. It is equally relevant for those new to Web 2.0, or those with more experience wishing to gain further insight into its application.
