kappa delta member handbook 2022: Supporting Activist Practices in Education
Ramsay-Jordan, Natasha N., Crenshaw, Andrea N., 2024-02-27 In today's educational landscape, a pressing issue looms: deeply entrenched within the system are the prevailing cultural norms that have historically perpetuated the dominance of white, middle-class values. This has, in turn, marginalized and stigmatized traditionally underrepresented student cultures as inherently deficient. As the United States educational system grapples with a dramatic increase in low-income, non-white, and linguistically diverse students, now is the time to confront these inequalities that undermine student achievement. This challenge has thrust teachers into the forefront, compelling them to embrace social justice practices in their classrooms as counternarratives. *Supporting Activist Practices in Education* emerges as a timely and essential solution to address this educational conundrum. Within the pages of this book, a compelling narrative unfolds—one that delves deep into the experiences of educators who actively employ teaching as a form of activism, transcending traditional norms. Teaching through activism, as defined in this volume, represents the courageous actions of educators who champion participatory citizenship for social justice within their classrooms, nurturing environments that foster critical thinking about the world. This book emphasizes the imperative of challenging and dismantling systemic injustices, and it underscores the pivotal role of social justice as a framework for effective pedagogical practices.

kappa delta member handbook 2022: Librarians as Researchers Paul C. Campbell, Sarah

Nagle, 2025-08-07 This book is designed to empower librarians to develop their research skills and embrace their identities as scholars. Many librarians, particularly those in academic libraries, are expected to engage in research and scholarly output. However, unlike disciplinary faculty, most librarians have not completed a PhD program, and many have never designed or participated in original research upon embarking on their career. This edited volume provides inspiration and support for academic librarians looking to develop or refresh their research skills and develop their scholarly identities. The focus of this book is toward empowering librarians as researchers, rather than librarians supporting student or faculty research. This book provides a venue for librarians to share their knowledge on different aspects of research as well as build community for other librarians to actualize their own identities as researchers. The existing literature and research in the realm of librarian identity development often touches on librarian identities in the face of emerging technologies and new library types, or how librarians can support research at their institutions. However, there is a gap in the literature around librarians developing their own identities as researchers. Librarians have a unique role in the scholarly community; we often sacrifice our own research interests so that we can provide support and instruction to others, whether it be faculty, students, or the public. But the library world holds immense opportunity for developing and executing original research. Additionally, conducting research is beneficial to librarians' individual practice as well as the library community as a whole. This edited volume will provide guidance as well as actionable methods for librarians to develop foundational research philosophies, create communities of practice, and hone practical skills in a wide range of research areas.
