For example, a classic logic puzzle may ask: “There are three houses painted red, blue, and green. Each house has a different owner. If the green house is to the left of the red house and the blue house is on the right, who lives in which house?” The answer shows you how to use process of elimination and positional reasoning.

2. Number Riddles

By reviewing brain teasers worksheet 2 answers for number riddles, you learn to identify arithmetic sequences, geometric patterns, or hidden operations that aren’t immediately obvious.

3. Word-Based Brain Teasers

These teasers often involve anagrams, puns, or lateral thinking related to language. The answers help you understand how subtle clues or wordplay can guide you toward the correct solution.

For instance, a riddle might say: “I speak without a mouth and hear without ears. I have nobody, but I come alive with the wind. What am I?” The answer, “an echo,” illustrates the importance of abstract thinking and metaphor in word-based puzzles.
