global business today 12th edition: Issues in Global Business SAGE Publishing, 2021-03-11 In 2020, COVID-19 starkly demonstrated the global interconnectedness of business, as it disrupted supply chains and manufacturing operations, broadly shuttered retail stores, and led to restrictions on movement and travel around the world. Other events in 2019 also showcased the undeniable globalization of business, be it from the (un)expected ramifications of Brexit to the impacts of data breaches across various industries. Riots in Hong Kong over an extradition bill also sparked huge debate and controversy, and the U.S.-China trade war also caused concern. All of these events may have largely and immediately impacted one region, yet effects reverberate across larger swathes of the globe—ultimately affecting vast areas, industries, and sectors across the international landscape. Issues in Global Business explores all of these and more, across a wide range of topics, including the on-demand economy, global manufacturing, Bitcoin, data security, and many more. Coupled with a comprehensive overview of the business landscape around the world by Dr. Mamoun Benmamoun, an assistant professor at the Boeing Institute of International Business at Saint Louis University, this book provides students with the essential information they need to assess business practices through an international lens.

global business today 12th edition: European SME's and Global Business Henry Langseth, 2009-05-05 Globalisation has instigated huge changes in the competitive environment for business entrepreneurs, and both large and small firms now frequently operate in similar conditions. Most research studies in international business have tended to focus on the market growth and internationalisation of large-scale and multinational companies as opposed to the experiences of more small-scale enterprises. The research outlined in this volume is radical and different in this regard. Employing cases studies from a range of Norwegian-based SMEs (Small-to-Medium-based enterprises), this volume explores the diverse factors which influence the speed of entrepreneurial internationalisation and the significance of this development for both the entrepreneur and the government bodies which provide support to such businesses. Market advantage frequently accrues to those who enterprises who internationalise quickly and who are quicker than others to embrace both foreign markets and a more internationally-focussed signature brand or identity. This research

outlined here is an important addition to the growing body of literature which analyses the forces influencing modern-day market internationalisation.

Nolan, 2001-07-26 China has used industrial policies to try to build large corporations that can challenge those based in more advanced countries. By the late 1990s the operational mechanism of China's large firms had seen large advances. Simultaneously, a revolution has taken place in global business systems, and China's large firms are even further behind the global leaders than when they began their reforms. The WTO will require China to operate rapidly on the 'global playing field' in competition with the world's leading corporations, and this increased gap presents a deep challenge for China's business and political leaders. Peter Nolan presents here the first in-depth case studies of China's large corporations under economic reform, combined with systematic benchmarking of these firms against the world's leading corporations. The book is an unrivalled resource of information on Chinese businesses, and also leads the reader to consider the impact of China's response to its current challenges not only on China itself, but on the wider global economy.
