imperialism word search answer key: *The New Global History* Bruce Mazlish, 2006-09-27
From a distinguished author in the field, The New Global History is a critical inquiry into the historical process of globalization, which is seen as a distinctly twentieth century phenomenon with its roots in the age of expansion of the early modern world. Cutting across disciplinary boundaries, The New Global History offers a fresh, overarching view of the process of globalization that is always empirically based and discusses the most important themes, such as policy, trade, cultural imperialism and warfare. Bruce Mazlish argues that globalization is not something that the West has imposed upon the rest of the world, but the result of the interplay of many factors across continents. Students of history, politics and international studies, will all find this a valuable resource in the pursuit of their studies.

Sachs, 2017-12-15 The Oxford History of Anglicanism provides a global study of Anglicanism from the sixteenth century to the twenty-first. The five volumes in the series look at how Anglican identity was constructed and contested since the English Reformation of the sixteenth century, and examine its historical influence during the past six centuries. They consider not only the ecclesiastical and theological aspects of global Anglicanism, but also the political, social, economic, and cultural influences of this form of Christianity that has been historically significant in Western culture, and a burgeoning force in non-Western societies since the nineteenth century. Written by international experts in their various historical fields, each volumes analyses the varieties of Anglicanism that have emerged. The series also highlights the formal, political, institutional, and ecclesiastical forces that have shaped a global Anglicanism; and the interaction of Anglicanism with informal and

external influences which have both moulded Anglicanism and been fashioned by it. Volume five of *The Oxford History of Anglicanism* considers the global experience of the Church of England in mission and in the transitions of its mission Churches towards autonomy in the twentieth century. The Church developed institutionally, yet more than the institutional history of the Church of England and its spheres of influence is probed. The contributors focus on what it has meant to be Anglican in diverse contexts. What spread from England was not simply a religious institution but the religious tradition it intended to implant. The volume addresses questions of the conduct of mission, its intended and unintended consequences. It offers important insights on what decolonization meant for Anglicans as the mission Church in various global locations became self-reliant. This study breaks new ground in describing the emergence of an Anglicanism shaped more contextually than externally. It illustrates how Anglicanism became enculturated across a broad swath of cultural contexts. The influence of context, and the challenge of adaption to it, framed Anglicanism's twentieth-century experience.
