Step-by-Step Guide Through The Secret of the House Chapter 2 Walkthrough

Now that we've set the stage, let's delve into the detailed walkthrough that will lead you

through the mysterious second chapter.

1. Entering the Haunted Study Room

Your journey begins in the study room, a dimly lit space filled with dusty books, old furniture, and cryptic papers scattered around. Upon entering, take a moment to examine the environment thoroughly. Look for:

- A **locked drawer** in the desk.
- A **strange painting** hanging crookedly on the wall.
- A **journal page** lying on the floor near the bookshelf.

These objects are your first clues. The locked drawer requires a key, which you'll find later, but the journal page contains hints about a code to a safe located nearby. Pay attention to the numbers or symbols mentioned.

2. Solving the Painting Puzzle

The crooked painting isn't just a decorative piece. Interact with it to reveal a hidden compartment. Inside, you'll find a small mechanical part—an essential item for a puzzle in the next room.

To solve this:

- Carefully rotate the painting until it clicks.
- Retrieve the mechanical part without alerting any nearby threats.
- Use the part later to repair a broken mechanism.

This puzzle encourages players to look beyond the obvious and explore every interactive element in the environment.

3. Unlocking the Safe with the Journal Clues

Head to the locked safe located on the opposite side of the study. Using the clues from the journal page, input the correct code. If you missed the journal, revisit the bookshelf or floor to find it.

Inside the safe, you'll discover a **rusty key**—a crucial item that opens the locked drawer in the desk. Make sure to collect it promptly to progress further.

4. Opening the Desk Drawer and Finding the Map

Use the rusty key on the drawer. Inside, you'll find an old, tattered map of the house's

basement. This map is indispensable because it reveals secret passages and safe zones where you can hide from enemies.

Study the map carefully. It marks:

- Hidden doors behind bookshelves.
- Locations of collectible items.
- Safe spots to plan your next move.

With this information, your navigation through the house becomes more strategic and less reliant on trial and error.

5. Navigating to the Basement and Avoiding the Entity

The basement is the most dangerous section of chapter 2. A sinister entity prowls here, so stealth is vital. Use the map to find:

- The hidden door behind the bookshelf.
- A path that avoids the main hallway where the entity patrols.

Move slowly and hide behind objects when you hear footsteps. Use distractions like throwing small items to divert the entity's attention. Patience and timing are key to surviving this part.

6. Repairing the Basement Mechanism

Once you safely reach the basement, you'll encounter a broken mechanism blocking your way. Remember the mechanical part from the painting? Use it here to repair the device.

The process involves:

- Placing the mechanical part into the slot.
- Turning the lever to activate the mechanism.
- Listening for the sound indicating success.

This will open a secret passage leading to the next area of the house.
