International Financial Management Cheol S. Eun, Bruce G. Resnick, Tuugi Chuluun, 2024 We (Cheol and Bruce) have been teaching international financial management to undergraduates and M.B.A. students at Georgia Institute of Technology, Wake Forest University, and at other universities we have visited for more than three decades. During this time period, we conducted many research studies, published in major finance and statistics journals, concerning the operation of international financial markets. As one might imagine, in doing this we put together an extensive set of teaching materials that we used successfully in the classroom. As the years went by, we individually relied more on our own teaching materials and notes and less on any one of the major exist-ing textbooks in international finance (most of which we tried at some point). In this tenth Edition, we introduce Tuugi Chuluun from Loyola University Maryland, who joins us as a co-author and will continue the tradition we have established in offering up-to-date and timely coverage of the subject of international financial management--
