Contextual Background and Authorial Perspective

Sherman Alexie's career is marked by his insightful storytelling that often challenges stereotypes and sheds light on the lived realities of Native Americans. "Ten Little Indians," a title echoing both the historical poem and the controversial nature of racial terminology, is a deliberate invocation designed to provoke reflection on Indigenous identity and the ramifications of colonialism.

The narrative is set against the backdrop of reservation life and urban Indigenous existence, juxtaposing traditional cultural values with modern challenges. The story of the American West has similarly journeyed across boundaries, in a two-way movement, sometimes feeding the idea of that myth, sometimes challenging it. This collection of essays relates to the notion of the traveling essence of the myth of the American West from different geographical and disciplinary standpoints. The volume originates in Europe, in Spain, where the myth traveled, was received, assimilated, and re-presented. It intends to travel back to the West, in a two-way cross-cultural journey, which will hopefully contribute to the delineation of the New—always self-renewing—American West. ten little indians by sherman alexie: Native American Son Kate Buford, 2010-10-26 The first comprehensive biography of the legendary figure who defined excellence in American sports: Jim Thorpe, arguably the greatest all-around athlete the United States has ever seen. With clarity and a fine eye for detail, Kate Buford traces the pivotal moments of Thorpe's incomparable career: growing up in the tumultuous Indian Territory of Oklahoma; leading the Carlisle Indian Industrial School football team, coached by the renowned "Pop" Warner, to victories against the country's finest college teams; winning gold medals in the 1912 Olympics pentathlon and decathlon; defining the burgeoning sport of professional football and helping to create what would become the National Football League; and playing long, often successful—and previously unexamined—years in professional baseball. But, at the same time, Buford vividly depicts the difficulties Thorpe faced as a Native American—and a Native American celebrity at that—early in the twentieth century. We also see the infamous loss of his Olympic medals, stripped from him because he had previously played professional baseball, an event that would haunt Thorpe for the rest of his life. We see his struggles with alcoholism and personal misfortune, losing his first child and moving from one failed marriage to the next, coming to distrust many of the hands extended to him. Finally, we learn the details of his vigorous advocacy for Native American rights while he chased a Hollywood career, and the truth behind the supposed reinstatement of his Olympic record in 1982. Here is the story—long overdue and brilliantly told—of a complex, iconoclastic, profoundly talented man whose life encompassed

both tragic limitations and truly extraordinary achievements.

It argues that cultural, political and economic elites make use of cultural and ethnic elements in city planning and architecture in order to construct a unique image of a particular city and demonstrates how the use of ethnicized cultural production - such as urban branding based on local identities - by the economic elite raises issues of considerable concern in terms of local identities, as it deploys a practical logic of capital exchange that can overcome forms of cultural resistance and strengthen the hegemonic colonization of everyday life. At the same time, it shows how ethnic communities are able to use ethnic labelling of cultural production, ethnic economy or ethno-tourism facilities in order to change living conditions and to empower its members in ways previously impossible. Of wide ranging interest across academic disciplines, this book will be a useful contribution to Inter-American studies.

ten little indians by sherman alexie: *Indigenous Cities* Laura M. Furlan, 2017 In *Indigenous Cities* Laura M. Furlan demonstrates that stories of the urban experience are essential to an understanding of modern Indigeneity. She situates Native identity among theories of diaspora, cosmopolitanism, and transnationalism by examining urban narratives--such as those written by Sherman Alexie, Janet Campbell Hale, Louise Erdrich, and Susan Power--along with the work of filmmakers and artists. In these stories, Native peoples navigate new surroundings, find and reformulate community, and maintain and redefine Indian identity in the postrelocation era. These narratives illuminate the changing relationship between urban Indigenous peoples and their tribal nations and territories and the ways in which new cosmopolitan bonds both reshape and are interpreted by tribal identities. Though the majority of American Indigenous populations do not reside on reservations, these spaces regularly define discussions and literature about Native citizenship and identity. Meanwhile, conversations about the shift to urban settings often focus on elements of dispossession, subjectivity, and assimilation. Furlan takes a critical look at Indigenous fiction from the last three decades to present a new way of looking at urban experiences that explains mobility and relocation as a form of resistance. In these stories Indian bodies are not bound by state-imposed borders or confined to Indian Country as it is traditionally conceived. Furlan demonstrates that cities have always been Indian land and Indigenous peoples have always been cosmopolitan and urban.--
