Step-by-Step Installation Tips

Setting up your heater is straightforward if you follow the manual's instructions carefully:

1. **Choose an Appropriate Location:** Place the heater on a flat, stable surface away from flammable materials like curtains or paper. Ensure there's adequate clearance around the unit to allow proper airflow.
2. **Plug into a Suitable Outlet:** Use a grounded electrical outlet that matches the voltage requirements specified in the manual. Avoid extension cords, as they can cause overheating.
3. **Check the Power Cord:** Inspect the cord for any visible damage before plugging in.
4. **Initial Testing:** Turn on the heater and cycle through the heat settings and thermostat controls to confirm everything is functioning properly.

Following these setup guidelines from the Lifesmart infrared heater manual ensures your unit operates safely and efficiently from day one.

Safety Precautions to Keep in Mind
